Dear HVCS Families,

As required by Tennessee State law, HVCS has hired an accredited inspector/management planner to determine the location and condition of any asbestos in our school. A new AHERA Management Plan has been prepared to include all buildings and areas where student activities are conducted. The results of this inspection, periodic inspections, and three-year re-inspections are available for review in the office of the school.

The original Management Plan was prepared by ATEC Environmental Consultants dated March 12, 1989. Due to the growth of the school, to include additional buildings, a revised replacement plan was prepared by Alternative Actions, Inc. over the past few months which has brought the school up to date with all requirements. All material, friable and nonfriable, throughout the school has been sampled. HVCS does not have a health hazard from asbestos building materials. The continued implementation of our asbestos management plan will ensure that a health hazard does not arise in the future.

The Management Plan is available for review by appointment during school hours. Please contact the office if you have any questions or concerns.

For His Glory,

Jack Exum

"Train a child in the way he should go and when he grows old he will not depart from it."

Proverbs 22:6
